

7dBi High-gain Directional Antenna

FDW-2407

*7dBi high-gain directional antenna,
Increase coverage and extend network into difficult to reach areas,
Reduce interference with other Access Points by using directional signal*

Description:

FDW-2407 7dBi High-gain Directional Antenna

The FDW-2407 is an indoor, high-gain Wi-Fi antenna. It is a directional 7dBi antenna with a frequency range of 2.4GHz to 2.5GHz. The FDW-2407 is a simple and inexpensive yet effective way to improve transmission for your wireless device, especially when the 1m cable can help it reach a better position for reception.

Features:

802.11n 7dbi High Gain Directional Antenna

- + 2.4GHz~2.5GHz frequency range
- + Compliant with IEEE 802.11b/g/n wireless devices
- + 7dBi high-gain directional antenna
- + 1m cable
- + SMA female connector
