

# 802.11n Wireless AP/Firewall/Router

## FDW-386R

*802.11n (Draft 2.0 compliant), 2x2 MIMO, WEP/WPA/WPA2, AP/Router/Switch/Firewall, 4 LAN ports/1 WAN port, PPPoE, WDS*

### Description:

#### Introduction

The FDW-368R is a 300Mbps Wireless-N router, wireless access point, four-port switch, and firewall all-in-one.

Utilizing advanced MIMO technology, WLAN range is double that of 802.11g products. The FDW-368R also provides WDS (Wireless Distribution System), enabling the bridging of other wireless routers and extending wireless coverage.

Plenty of features are bundled to better secure and manage a network, including; port and MAC address filters, WPS (Wi-Fi Protected Setup), QoS bandwidth control, and the ability to disable SSID broadcast. Management from anywhere is conveniently accomplished through a web interface.

The FDW-368R is the ideal choice for small or home offices in search of a fast, secure, easy-to-use, and feature-rich wireless network.

### Features:

#### 802.11n Access Point/Firewall/Router

+ Wireless 802.11b/g/n with 4 10/100 LAN ports and one 10/100 WAN Port

#### Security:

- + Integrated Firewall
- + WEP/WPA/WPA2
- + WPS
- + MAC filter
- + PPPoE

#### Other Features:

- + MIMO/Dual Internal antennas
- + Web based Management
- + Autonegotiate 10/100 ports
- + Auto MDI/MDIX
- + UPnP
- + DDNS
- + System Log
- + SNTP
- + DHCP client/server
